

JG-IA High Pressure Cell Crusher

This machine utilizes high pressure principle to crush and extrude cell, especially suitable for crushing thick wall cells, germ and thick sample, with characteristics of fast, convenient and noiseless. The machine is widely used in universities and colleges, biologic engineering labs of scientific research units and pharmacy factories.

Main technical parameters :

Model	Voltage	Capacity	Max. crash pressure
JG - IA	380V	50ml/time continuous sample, applied to science and research	256Mpa(37120PSi)
